## **New European Headquarters for ROTOCONTROL**

***A 1000sqm building located in Siek, Germany will soon provide demonstrations, factory acceptance testing, training, and final machine assembly.***

LINAU, Germany (January 22, 2020) - ROTOCONTROL is moving its European headquarters to a new facility in Siek, Germany (near Hamburg). The 1000sqm building will provide a showroom for product demonstrations, factory acceptance testing, operator training and final machine assembly for ROTOCONTROL's range of label finishing machines. The move is scheduled for this March.

"A number of exciting developments are in store for ROTOCONTROL in 2020," said ROTOCONTROL managing director Marco Aengenvoort. "In addition to our new headquarters in Siek, we expanded our sales force with three new sales managers (two in Europe and one in South America); will soon announce a new industry partnership and two product additions to our Ecoline finishing series; and are gearing up for two major tradeshow this year at drupa and Labelexpo Americas, together with our parent company EMT International."

**ROTOCONTROL's new facility in Siek, Germany**

Sales, engineering and service will continue to operate out of ROTOCONTROL's new location. Local 24/7 service and sales support teams are also positioned throughout North America, in addition to customer support from ROTOCONTROL's world-wide Agent network.

Finishing machines that ROTOCONTROL will demonstrate from their new showroom in Siek include the Ecoline economy suite of finishing equipment, the RSC inspection slitter rewinder, the RSP pharmaceutical security label finishing machine, and the end-to-end DT Hybrid Series for digital label

printing and finishing.

"I look forward to welcoming printers to ROTOCONTROL's new facility and showroom in Siek," concluded Aengenvoort.

---

### ***About Rotocontrol International GmbH***

ROTOCONTROL, a wholly owned subsidiary of EMT International ([www.emtinternational.com](http://www.emtinternational.com)), designs and manufactures leading-edge finishing machines for label inspection, slitting, rewinding, die cutting, overprinting, digital and booklet printed labels, for converters in the narrow web industry. Available globally, ROTOCONTROL offers machines from smaller basic rewinders to feature-rich, sophisticated models with multiple options featuring S-Drive servo technology enabling maximum web control for the most delicate film and foil materials.

With facilities in Germany and the USA, ROTOCONTROL maintains the highest level of product quality through ease of use, absolute control and flexibility with a focus on operator safety and efficiency. ROTOCONTROL is the partner of choice in the finishing of label products.
